Special Notice

A difficult condition confronts the planter and seedsmen this year. Owing to the severe drouth the past summer and fall the Cane, Millet, Sudan, Kaffir, and Maize was so greatly curtailed that the country has the smallest supply of these seed that has been grown in a great many years. We commenced early to look for these seed and have secured a very good stock for our customers. We advise ordering early for we believe stocks will be sold out earlier than usual. We make our usual offer, if seeds you order do not please you on receipt of same, return them, and we will refund your money. You can depend on the germination and purity of all seed we send out.

The farm is rare that will not grow it and the planter is not realizing what he should from his land if he has not a patch on his farm. Next to Cotton it produces more money for the Oklahoma farmer than any other crop. We will send you samples and firm prices on application.
